Ar Vulhtute Zawhna Leh Chhanna

-Dr.K.Lalrintluanga M.V.Sc.

Zawhna 1. Arpui nge upa artui?

Chhanna - Arpui le ! (Gen 1:21)

Zawhna 2. Ar hi engtia upa an nih in nge an tui?

Chhanna- Chawlhkar 20 vel an nihin an tui tan thei.

Zawhna 3. Arpa pawl lohin arpui ringawt hi a tui thei em?

Chhanna- Artui hi a nu chi a ni mai a, hmeichhia pawh, mipa tel lova an awm mai main thlatin an chi an chhuahin “thi” an nei ang hian- Arpui hi a pa tel lovin a tui thei khawp mai.

Zawhna 4. Arpa pawl loh artui chu awpkeu tir atan a that ho em?

Chhanna- Tha lo, a keu thei lo.

Zawhna 5. Chutichu artui pakhat keu thei a siam turin arpui chu a pain a pawl ziah a ngai a ni maw?

Chhanna- Ngai love, arpain vawi khat a pawl hian arpui tui hmasa 5-7 vel thleng hi chu an keu thei tho a lawm.

Zawhna 6. Chu chu engtin nge a nih theih?

Chhanna- Arpa chi hi arpui chi kawng velah hian a tlem berah ni 5-11 vel thleng an dam thei a, chu chuan arpui chi nitina lo chhuak kha a lo kawp/K.S pui hmiah zel thin a ni.

Zawhna 7. Awpkeu tir a tan artui lian nge tha a te?

Chhanna- A lian lutuk leh a te lutuk a tha lo a, a tuitu ar thlah a zirin a tui len zawng tlangpui (average) a lian hi a tha ber. A tlangpuiin artui 53-58 grm vela rit hi an keu tha ber.

Zawhna 8. Artui lian atanga arnote keu hi a lian deuh em?

Chhanna- Lian deuh e. Ar keuh hlim reng reng hi a artui rih zawng za-a sawmrupanga (65%) vela rit an ni thin.

Zawhna 9. Chuti a nih chuan artui lian tha apiang hi awptir atan chuan a tha a ni mai lawm ni?

Chhanna- Nimai love, a lian hi an keu tha duh vak lova, a keu loh chuan engtihna mah a ni chuang hlei nem.

Zawhna 10. Awpkeu tir tur hian ar upa tui nge tha a, a tui tan tur tui?

Chhanna- A tui vanglai tak a, “a tui” hi a tha ber. Ar upa tui leh, a la tui hi an keu tha duh vak lova. Tin ar la a tui hmasa ber hi za-ah sawm (10%) vel chauh a keu thei, a tui pahnihna hi za-ah sawmli (40%) vel chauh a keu thei a ni.

Zawhna 11. Artui sawl deuh hi a arpa tur an ti thin a , a dik em?

Chhanna- Artui sawl deuh hi a pa tur a awm a, a ni tur pawh a awm bawk a, a sawl

avanga a pa tur a nihna chu a awm chuang dawn em ni?!

Zawhna 12. Atui hi arpui in a awp hian ni engzatnge an awp keu thin?

Chhanna- Ni 21 velah an awp keu thei.

Zawhna 13. Artui keu tha turin egtia lum nge tha tawk?

Chhanna- 35.5°C to 38°C vel.

Zawhna 14. Artuia arnote inseam thei tura Temperature hniam thei ber eng zat nge?

Chhanna- Ar note inseam thei tura temperature hniam ber hi ‘physiological zero’ anti a ,chu chu 25°C – 27°C a ni.

Zawhna 15. Artui eng tia upa/rei hi nge awp tir ila tha?

Chhanna- An tui ni atanga ni 7 vel chhung ngei hina awptir ila a a keu tha duh ber.

 796081 (Mizoram) Mob. No. 9612155176*

1. Fowl Typhoid :

Natna thlentu : *Salmonella gallinarum*
 Kum bi thliah : Arte atanga ar puitling thlengin an vei thei (A puitlingah a hluarbik).
 Kai chhawn dan : A tui atangin, chaw leh tui thianghlimlo ei atangin.
 Mortality : 10-50%
 A lan chhuah dan: Chaw eitui lo, hmulpawr, thla uai thla, ek hring, ngui
 Lesion (Kawchhung awm dan): An thin a lian a, a eng sen (tin tui ek rawng) deuh luap thin.
 Enkawl dan : Furaltadone @0.5 – 1g tui litre khat a pawlha ni 7 chhung pek.

2. Pullorum Disease/ Bacillary White Diarrhoea:

Natna thlentu : *Salmonella pullorum*
 Kum bi thliah : A tlangpuiin ar note pianghlim ah a tam.
 Kai chhawn dan : A tui laiin.
 Mortality : 90% thlengin
 A lan chhuah dan : Mutchhuak, chaw ei duh lo, thawk harsa, ek var, mawng berh, rang taka thihna.
 Lesion (Kawchhung awm dan) : Arte ah thin lian leh a vara de thek thek. Arpui tlingah chhul pian hmang dik lo leh rawng dik lo.
 Enkawl dan : Furaltadone @0.5 – 1g tui litre khat a pawlha ni 7 chhung pek.

3. Infectious Coryza :

Natna thlentu : *Haemophilus gallinarum*
 Kum bi thliah : Arte atanga ar puitling thlengin an vei thei (A puitlingah a hluar bik).

Kai chhawn dan: Boruak atangin.
 Mortality : Thihna thlen em a hlauhawm lo, kai darh erawh a awlsam.
 A lan chhuah dan: Hmai vung, hnar leh mit atanga hnai khal chhuak, thlik thlidir (wattle) vung, hah chhiau, 10 – 40% tleng a tui keu theihna tlahniam, chaw ei tui lo, ngui.
 Lesion (Kawchhung awm dan) : Hnar , mit leh hmai ruh inkarah hnang ang chi hnai var tam tak a awm
 Enkawl dan : Sulfamezathine @ 30 ml tui litre khat a pawlh a, ni 5-7 chhung pek.

4. Chronic Respiratory Disease (CRD):

Natna thlentu : *Mycoplasma gallisepticum*
 Kumbithliah : Arte atanga ar puitling tlengin an veithe (Arte ah a hluarbik).
 Kai chhawndan: A keu lai leh boruak atangin.
 Mortality : Ar note ah 30 – 40 %.
 A lan chhuah dan: Thaw ri bawrh bawrh, hnap tui tla, khuh, chaw eitui lo, 50% lain a tui a tlahniam.
 Lesion (Kawchhung awm dan) : Thawkna dawt ah thil hnang khal tak (cheesy materials) a awm.
 Enkawl dan : Tetracycline powder/ Tylosin@ 1g tui litre khat a pawlh a, ni 7 chhung pek.

5. Air sacculitis and Collibacillosis :

Natna thlentu : *E. coli*
 Kumbithliah : Arte kar 5 – 10 a upa.
 Kai chhawndan: A keu lai leh boruak atangin.
 Mortality : 5 – 10 %.
 A lan chhuah dan: Thawk harsat na, kawthalo, mawng berh.
 Enkawl dan : Tetracycline powder@ 1g tui litre khat a pawlh a, ni 7 chhung pek.

6. Ranikhet Disease/ New Castle Disease :

Natna thlentu : Paramyxovirus
 Kumbithliah : Arte atanga arpui tling tlengin an vei thin.

- Kai chhawn dan: Ar chaw, tui leh boruak thinglim lo (infected) atangin.
- Mortality : 50 – 90 %.
- A lan chhuah dan: Thawk dan a tibuai, hmulpawr, kawtha lo ek hring, ke pakhat emaw a pahniha zeng, khur, nghawng inherh, artui laiah a tui a chawl, ngui.
- Enkawl dan : Enkawl dan vak a awm lo, a kaidarh loh nana antibiotics pek.
- Vaccination : Karkhat naah a mit ah emaw a hnar ah Lasota vaccine far 1 far; kar 8-na leh 18-naah R₂B Mekteshwar vaccine 0.5 ml I/M pek tur.

7. Fowl Pox/ Avian Pox :

- Natna thlentu : Avipox virus
- Kumbithliah : Ar naupang ah a hluar bika a puitlingah a tlem deuh.
- Kai chhawn dan: Pem, hliam leh rannung seh atangin.
- Mortality : Ar note ah 50 %.
- A lanchhuahdan: A chhuang, thlikthlidir (wattle), hmai, mit ko-ah pan khir a awm.
- Enkawldan : Terramycin powder 5g tui litre 4.5-apawlh a pek tur, antiseptic lotion hnawihbawktur.
- Vaccination : Fowl pox vaccine-in kar 6-naah leh kar 16-naah injection tur (Wing web method)

8. Infectious Bursal Disease/ GumboroDisease :

- Natna thlentu : Birna virus
- Kumbi thliah : Ar kar 2 atanga kar 7-aupate'n an vei awlsam.
- Kai chhawn dan: Ar chaw, tui leh chaw pekna thianghlim lo atangin.
- Mortality : Ar tui laiah 40 %.

A lanchhuah dan: Mit meng lo, hmul pawr, kawtha lo, nguai, khur, mawngberh, ek rawng eng (yellow)

Enkawl dan : Natna dang kai loh nan antibiotic pek tur.
 Vaccination : IBD vaccine – ni 1-naah kaah far khat far; ni 28-na atanga ni 32-naah tui in tur a pawlh; ni 42-na atanga ni 46-naah tui in tur a pawlh.

9. Coccidiosis :

Natna thlentu : Broiler-ah *Eimeria tenella*, *E. maxima*, *E. acervulina* leh *E. mivati*.

Layer-ah *E. Burnetti* leh *E. necatrix*.

Kumbi thliah : Arte atanga a puitling thlengin an veitheia, kar 6 – 8 ah a hluar; kar 3- 5 a upa in an vei awlsam bik.

Kai chhawn dan: Chaw, tuithianghlim lo leh ek atangin.

Mortality : 0 - 50 %.

A lanchhuah dan: Ek thi, mawng berh, rih na tlahniam, hmul pawr, nguai, chaw eitui lo.

Enkawl dan : Coccidiostat emaw Anticox emaw Amprolium soluble powder 20% tui litre 1 ah 50- 60gm pawlhin ni 7 chhung pek tur ani.

Natna laka Ar vendan :

1. Tuithianghlim chauh pek tur.
2. Chaw tha leh thianghlim chauh pek tur.
3. Chaw hmuar leh hlui pek loh tur.
4. Ar chaw ei thin thlak that loh tur.
5. Boruak thianghlim luh theihna tur siamsak tur.
6. Tawt takin dah loh tur.
7. An awmna chhuat a hul tha tur a ni a, thlaksak fo tur a ni.
8. Boruak thianghlim lo ar in chhungah luhtir loh tur.
9. Chaw pekna leh tui pekna hmanrua fai tako sil tur a ni.
10. Ar in leh a vel a fai tha tur a ni.
11. Pawn lam mi (visitor) ar in chhungah luh tir loh tur.

One Health : Hriselna Huapzo

*Dr. Mahminga Sailo, M.V.Sc.(Med.)
Waggin' Tails, Bawngkawn*

Hriselna huapzo kaihthawh thar a ni

Kum AD 2000 laihawl khan khawvel puma hriselna lama thawktu pawl lian tak tak World Health Organization (WHO), World Organization for Animal Health (OIE), Food and Agriculture Organization (FAO), Center for Disease Control and Prevention (CDC) leh pawl lian tak tak tangrual chuan mihring hrisel zelna tura pawimawh em em Hriselna huapzo (One Health) hi thupua neiin, a hlawhtlin theih nan kawng hrang hrangin hma an la mek zel a ni. ‘Kaihthawh thar a ni’, han tih theih a nih chhan pawh kum BC 400 vel daih tawh khan Greek mi Hippocrates khanhriselna atana pawimawh - Boruak, Tui leh Chenna (Air, Water and Places) a hrisel kim a pawimawh thu ‘One

Medicine’ tia vuahin a lo au chhuahpui daih tawh vang a ni.

Hriselna huapzoin a tum ber chu kawng tinrenga hriselna lama thawh ho a ni. Khawvela mihring kan chen chhung chuan natnahrik, anmahnia nunna nei emaw nunna nei dang taksa hnea damkhawchhuak ve mai pawh ni se, mihring taksa ringawt an chhaih buai bik lo va. Mihring leh mihring atang te, ranvulh/ ramsa atangin emaw chenna leh avel atangin natnahrik hi che kual ve reng a.

Tin, heng natnahrikte hi an damkhawchhuah nan a tul leh an mamawh angin an insiam rem (mutate) ve hret hret thin bawk. Hei vang tak hian natna kan hriat ngai lem loh te avangin ran leh mihring kan na-in kan thi fo va; tin natna hri leng tawh sa te pawn

len nawn chang (emerging) an nei fo bawk. Hei vang tak hian mihring hriselna lama thawk (Medical) lam ringawtin hma lak kim theih a ni bik lova, Ran leh ramsa hriselna lama thawktu (Veterinarian) te leh pawl hrang hrang tanrual a tul ta reng a ni.

Covid-19 leh a kaihhnawih

A chunga kan sawilan tak ang khian nikum kum tawp lam atanga Wuhan, China ram atanga rawn irh chhuak natna tihbaiawm tak Covid-19
