(Dr. R.ZOTHANMAWII)
Director

Animal Husbandry & Veterinary Department
Government of Mizoram

1. Introduction:

Animal Husbandry & Veterinary Complex, Thenzawl is one of the most important institutions in the State. The Complex comprises various livestock farms, including Goat, Mithun, Zovawk, Poultry, and Waterfowl units.

A fodder plantation area of 23 hectares within the Complex produces several tonnes of green and dry fodder annually, which is made available to farmers across different regions at a very nominal cost.

The Complex also serves as a training and demonstration centre for Animal Husbandry activities, frequently visited by farmers, entrepreneurs, and students for educational and exposure purposes.

The proposed project aims to expand fodder cultivation by developing an additional 20 hectares of presently uncultivated land within the Complex through necessary infrastructural interventions. This expansion will significantly enhance fodder availability, directly benefiting livestock farmers.

Over the past three years, cattle population has declined sharply, mainly due to the shortage of fodder during the lean season. This scarcity has discouraged many dairy farmers from expanding their operations, with some even discontinuing dairy farming altogether.

The Complex has been making continuous efforts to support these farmers by producing quality green and dry fodder. However, the existing 23-hectare plantation is insufficient to meet the growing demand. A small river flowing through the Complex divides potential cultivable areas along its banks, posing operational challenges.

Expected outcomes of the project include:

- Doubling of fodder production
- Increased availability of fodder during the lean period
- Enhanced milk production
- Improved income for dairy farmers
