Dated Aizawl, the 5th April, 2018

OPEN TENDER NO. 1 OF 2018-2019

BACKGROUND OF THE PROJECT:

This project is implemented to bring about a standard standing of quality chicks and egg for production in the Southern part of Mizoram, control to check the volatile fluctuation of price rates regarding various poultry and poultry by-products which was mainly controlled and governed by middlemen importing poultry and poultry by-products from the neighbouring states. Presently the Indbro Hatchery Farm has a capacity of hatching 57600 eggs per incubation. However, the farm could utilized only half of its hatching capability due to limited production of hatching eggs since the farm has only 2 layer sheds with a capacity of housing 3000 layers and 1128 layers. Optimal utilisation of the present machinery can only be fulfilled through addition of infrastructure for egg production such as construction of at least 2 layer houses, 2 grower houses and 1 brooder houses.

The project will also help in commercialization of states owned poultry and poultry by-products thereby contributing a great factor to the increasing state economy and thereby boosting availability of quality poultry and poultry products at southern part of Mizoram.

To bring a uniform distribution of poultry and poultry product it is propose to establish a poultry farm exclusively for Lunglei district of 5000 nos of live bird capacity to cater the needs covering Lunglei, Lawngtlai and Saiha in particular to supply of Day Old Chicks and Brooded chicks
